

MICROCOL® CL-G

Natural calcium bentonite.

Qualified for the elaboration of products for direct human consumption in the field of the regulated use in Oenology. In accordance with the regulation (EU) n°2019/934.

Physical characteristics

Aspect Small size granulates
 Colour Beige – grey
 Apparent density about 2.6 g/cm³

Chemical analysis

pH (at 5%).....	6.5 - 8.5	Lead.....	< 5 ppm
Humidity	5 -15%	Arsenic.....	< 2 ppm
Calcium & Magnesium.....	< 100 mEq/100g	Iron.....	< 600 ppm
Sodium.....	< 10 g/kg		

Oenological use

Properties: Clarification and stabilization of wines.

Dosage: 20 to 100 g/hL (200 to 1000 ppm)

Preparation: let it swell in 10 to 15 times its weight in water, mix strongly and leave to swell in water before use (check the label and commercial sheet for guidance).

Remarks:

- Use an inert and clean container
- Do not use during enzyme treatment
- Use the product within 12 hours after preparation

Storage recommendation

Store above ground level in a dry area not liable to impart odours. Ensuring stock is kept at a moderate temperature, in its original, unopened packaging. Do not use opened packaging. Optimal date of use: **4 years after packing date.**

Packaging

15 Kg & 20 kg bags.
