MICROCOL CL-G

Natural calcium bentonite.
Qualified for the elaboration of products for direct human consumption in the field of the regulated use in Oenology. In accordance with the regulation (EC) n°606/2009.

Physical characteristics

- Aspect: Small size granulates
- Colour: Beige – grey
- Apparent density: about 2.6 g/cm³

Chemical analysis

- pH (at 5%): 6.5 - 8.5
- Humidity: 5 - 15%
- Calcium & Magnesium: < 100 mEq/100g
- Sodium: < 10 g/kg
- Lead: < 5 ppm
- Arsenic: < 2 ppm
- Iron: < 600 ppm

Oenological use

Properties: Clarification and stabilization of wines.
Dosage: 20 to 100 g/hL (200 to 1000 ppm)
Preparation: Let it swell in 10 to 15 times its weight in water, mix strongly and leave to swell in water before use (check the label and commercial sheet for guidance).
Remarks:
- Use an inert and clean container
- Do not use during enzyme treatment
- Use the product within 12 hours after preparation

Storage – D.I.U.O.

- Store in a dry and odourless room in the original packaging at room temperature (0 to 20°C)
- Optimal date of use: 4 years from packaging date
- Opened package: 1 month (if the bag is properly sealed)

Packaging

15 Kg & 20 kg bags.
