## SUPRAROM

---

*Oxidation protection for musts, preserving freshness and aromatic intensity.  
Qualified for the elaboration of products for direct human consumption within the scope of the regulated use in  
œnology. In compliance with the EC regulation n°606/2009.*

### Physical Characteristics

---

Aspect ..... powder  
Colour ..... brown  
Odor ..... pungent and suffocating odour of SO<sub>2</sub>

### Chemical Analysis

---

Ascorbic Acid ..... 25%  
Ash ..... < 2%  
Humidity ..... approximately 2%  
Potassium Metabisulphite ..... 50 %  
Tannins ..... 25 %

### Oenological Use

---

**SUPRAROM** is used on Botrytis-affected grapes. Add **SUPRAROM** immediately prior to crushing or into the press. For optimal usage, we advise testing laccase activity with the BOTRYTEST before addition.

Dosage: 10 to 25 g/100 kg of grapes.

Dissolve in 10 times its weight in cold water. Well closed begun(affected) packaging.

**EC Regulation:** Conforms to the SO<sub>2</sub> limits specified by the legislation in force within your country and abide by the right dosage for the maximum legal dosage of Sulfur dioxide in the wine.

### Storage & Optimal Date of Use

---

- Store in original packaging at room temperature (0 to 22°C) in a dry and odourless room.
- Optimal date of use: **3 years after packing date.**
- Opened bag well closed after use: **4 months**

### Packaging

---

1kg bag

**LAFFORT**

*l'œnologie par nature*
